

# REC7 SPRING GUN

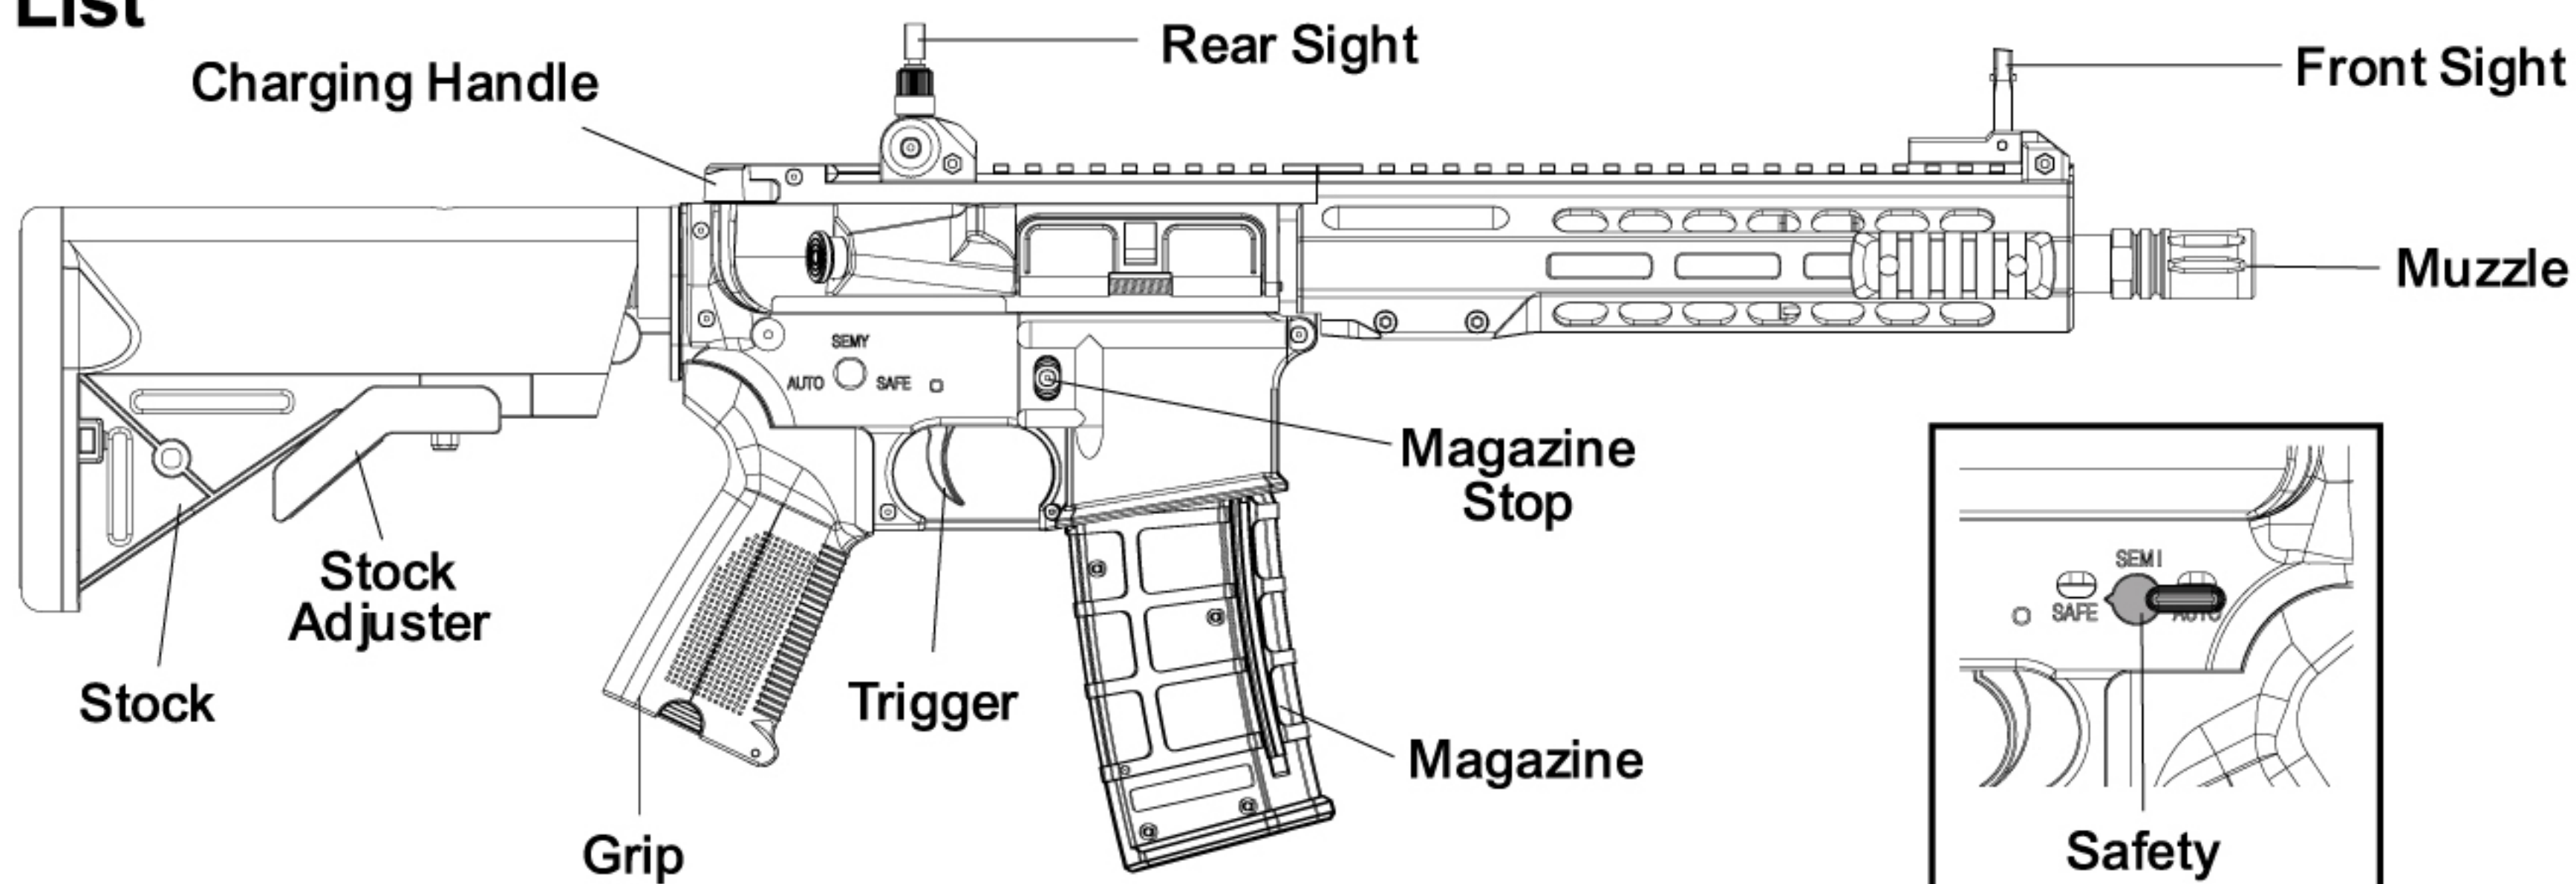

PACKAGE

AIRSOFT  
SPRING GUN

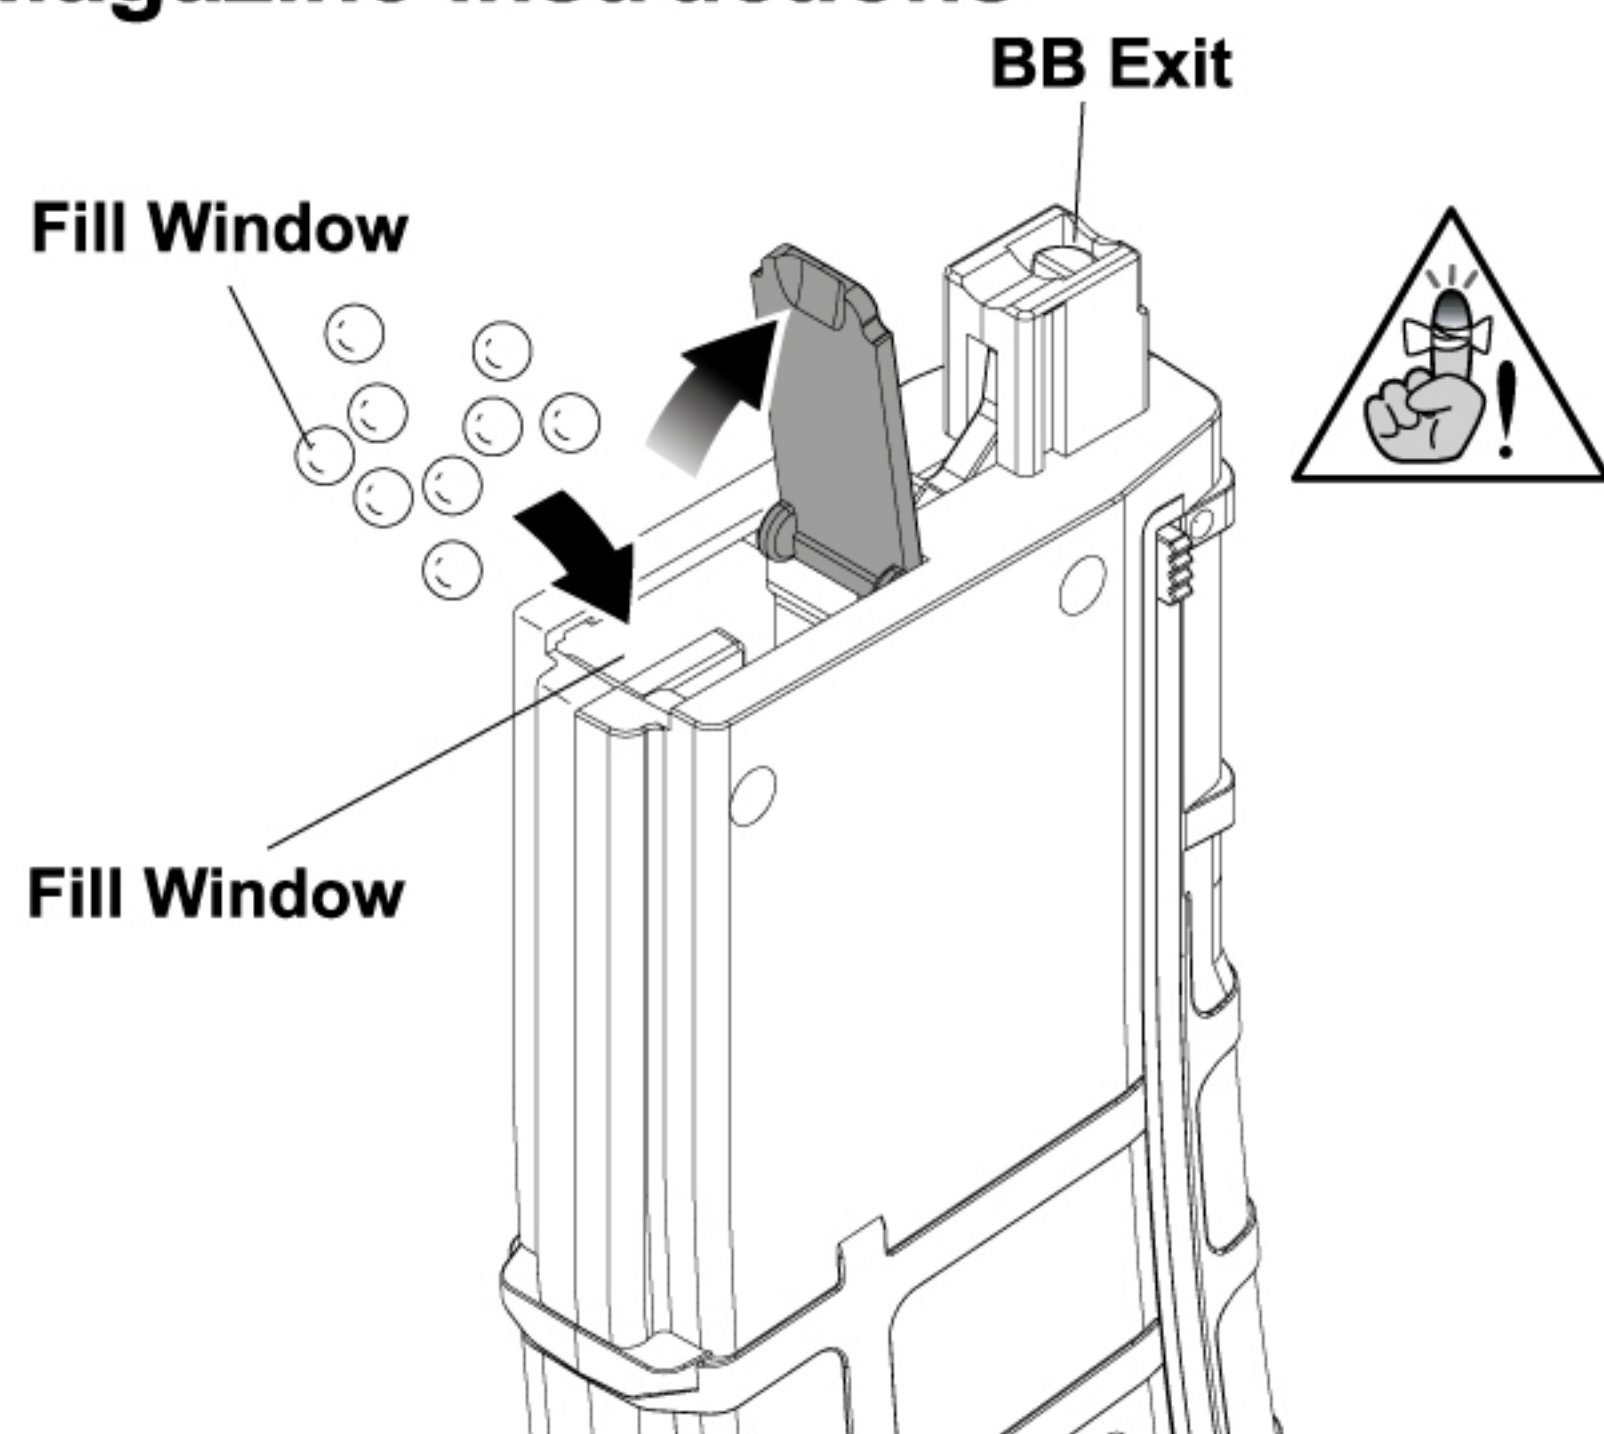

This is not a toy. Misuse may cause serious injury or death. Eye protection designed for air soft guns must be worn by the user and any person within range. Read the owner's manual before using. This product is designed for users 18 years or older. Adult supervision required. Be advised that this product can be mistaken for a firearm by law enforcement officers or others. Brandishing or displaying the product in public may cause confusion and may be a crime. Altering the coloration or markings required by state or federal laws and regulations for the purpose of making the product look more like a firearm is dangerous and may be illegal. Purchaser and user of this product shall adhere and be fully responsible for all local laws regulating the usage and ownership of airsoft guns. Only transport this item in it's proper carrying device.

## ● Part List

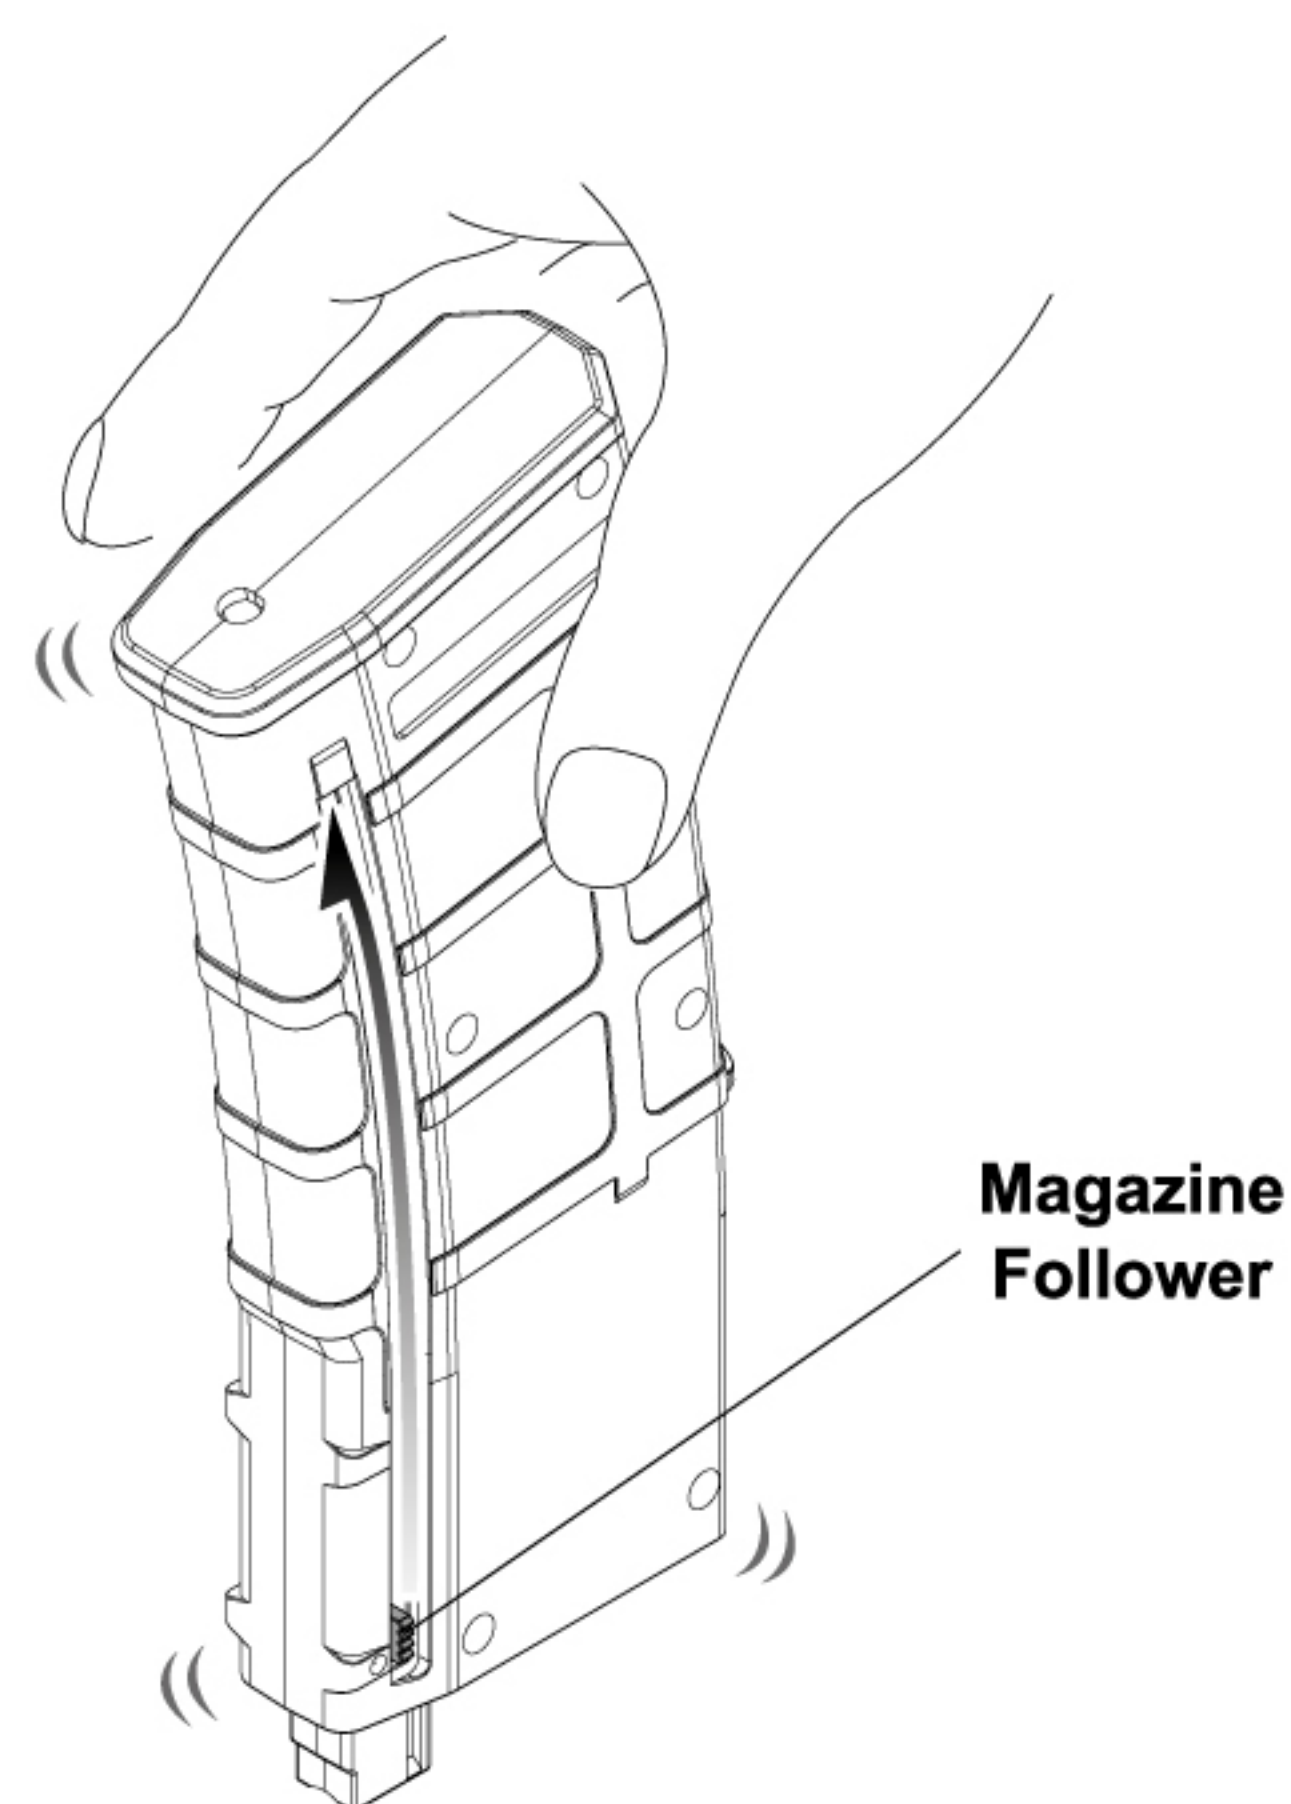

If too many BBs are inserted, the lid will not close. Ensure that only BBs enter the fill well. Carefully close BB lid to avoid fingers or foreign objects getting caught in the well.

## ● Magazine Instructions

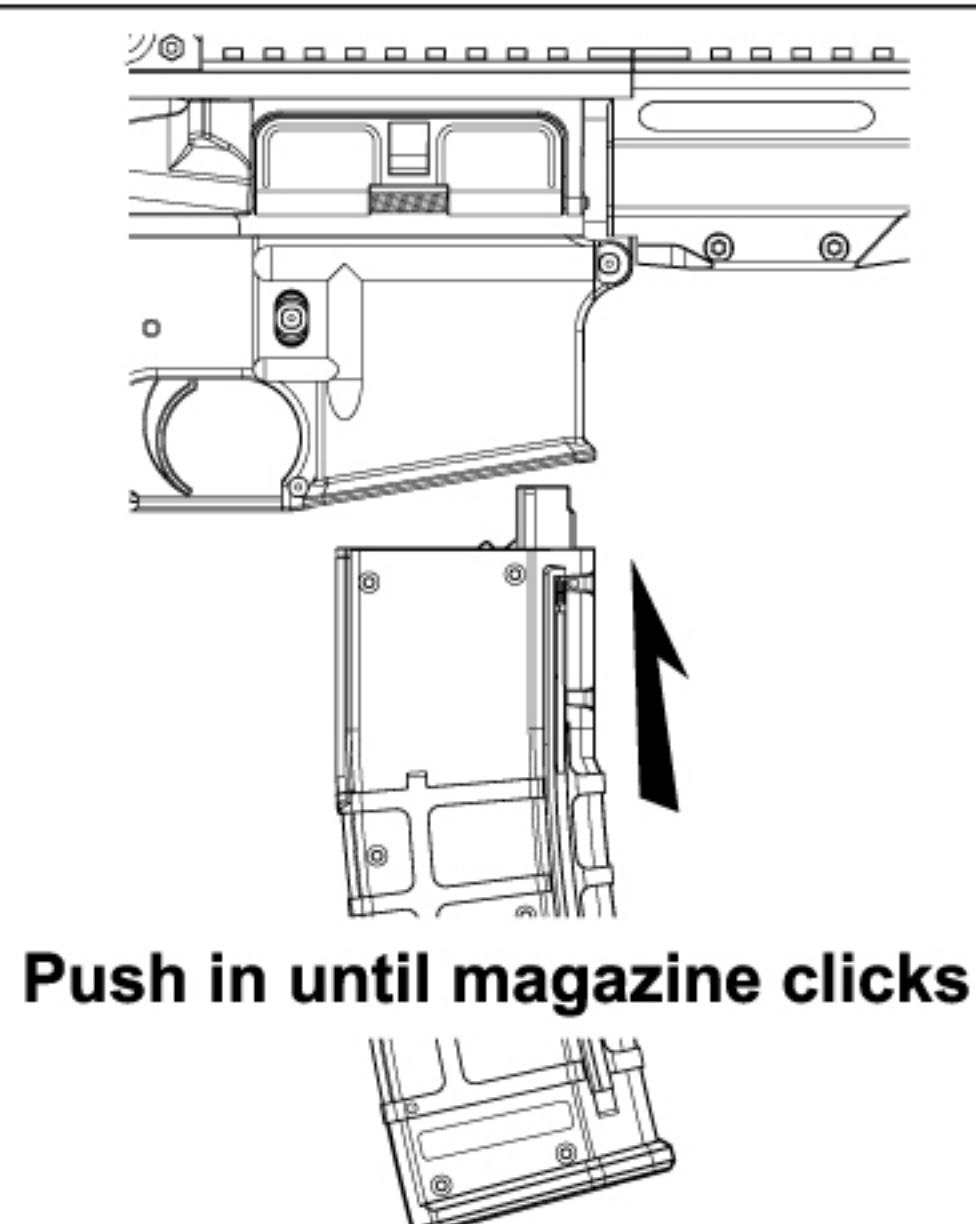

- ① Open the fill window to insert BBs. Holds around 550 BBs.
- ② Close BB fill window.

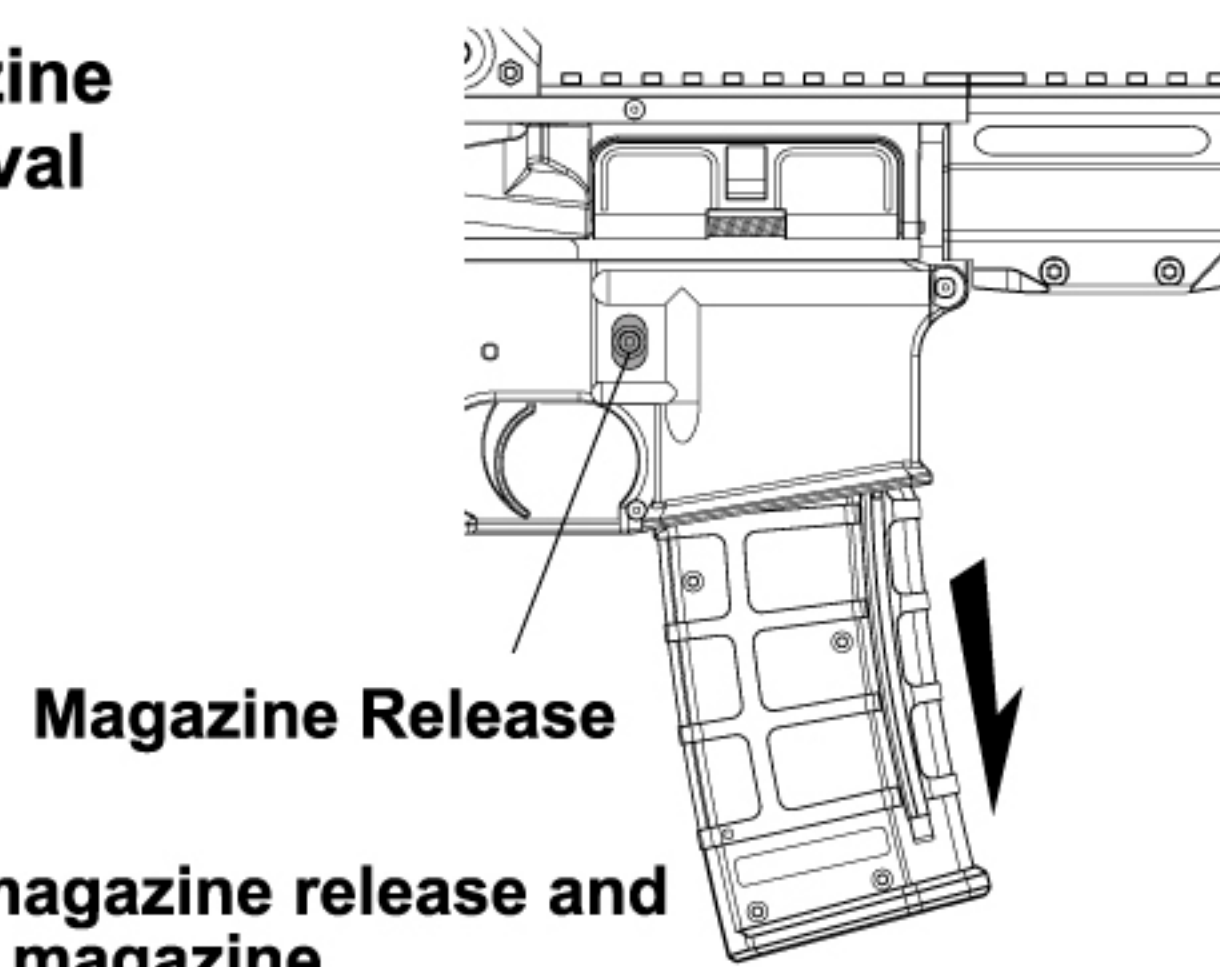

- ③ Pull down the Magazine Follower and shake the magazine to load BBs.

### \*Magazine Insertion

### \*Magazine Removal

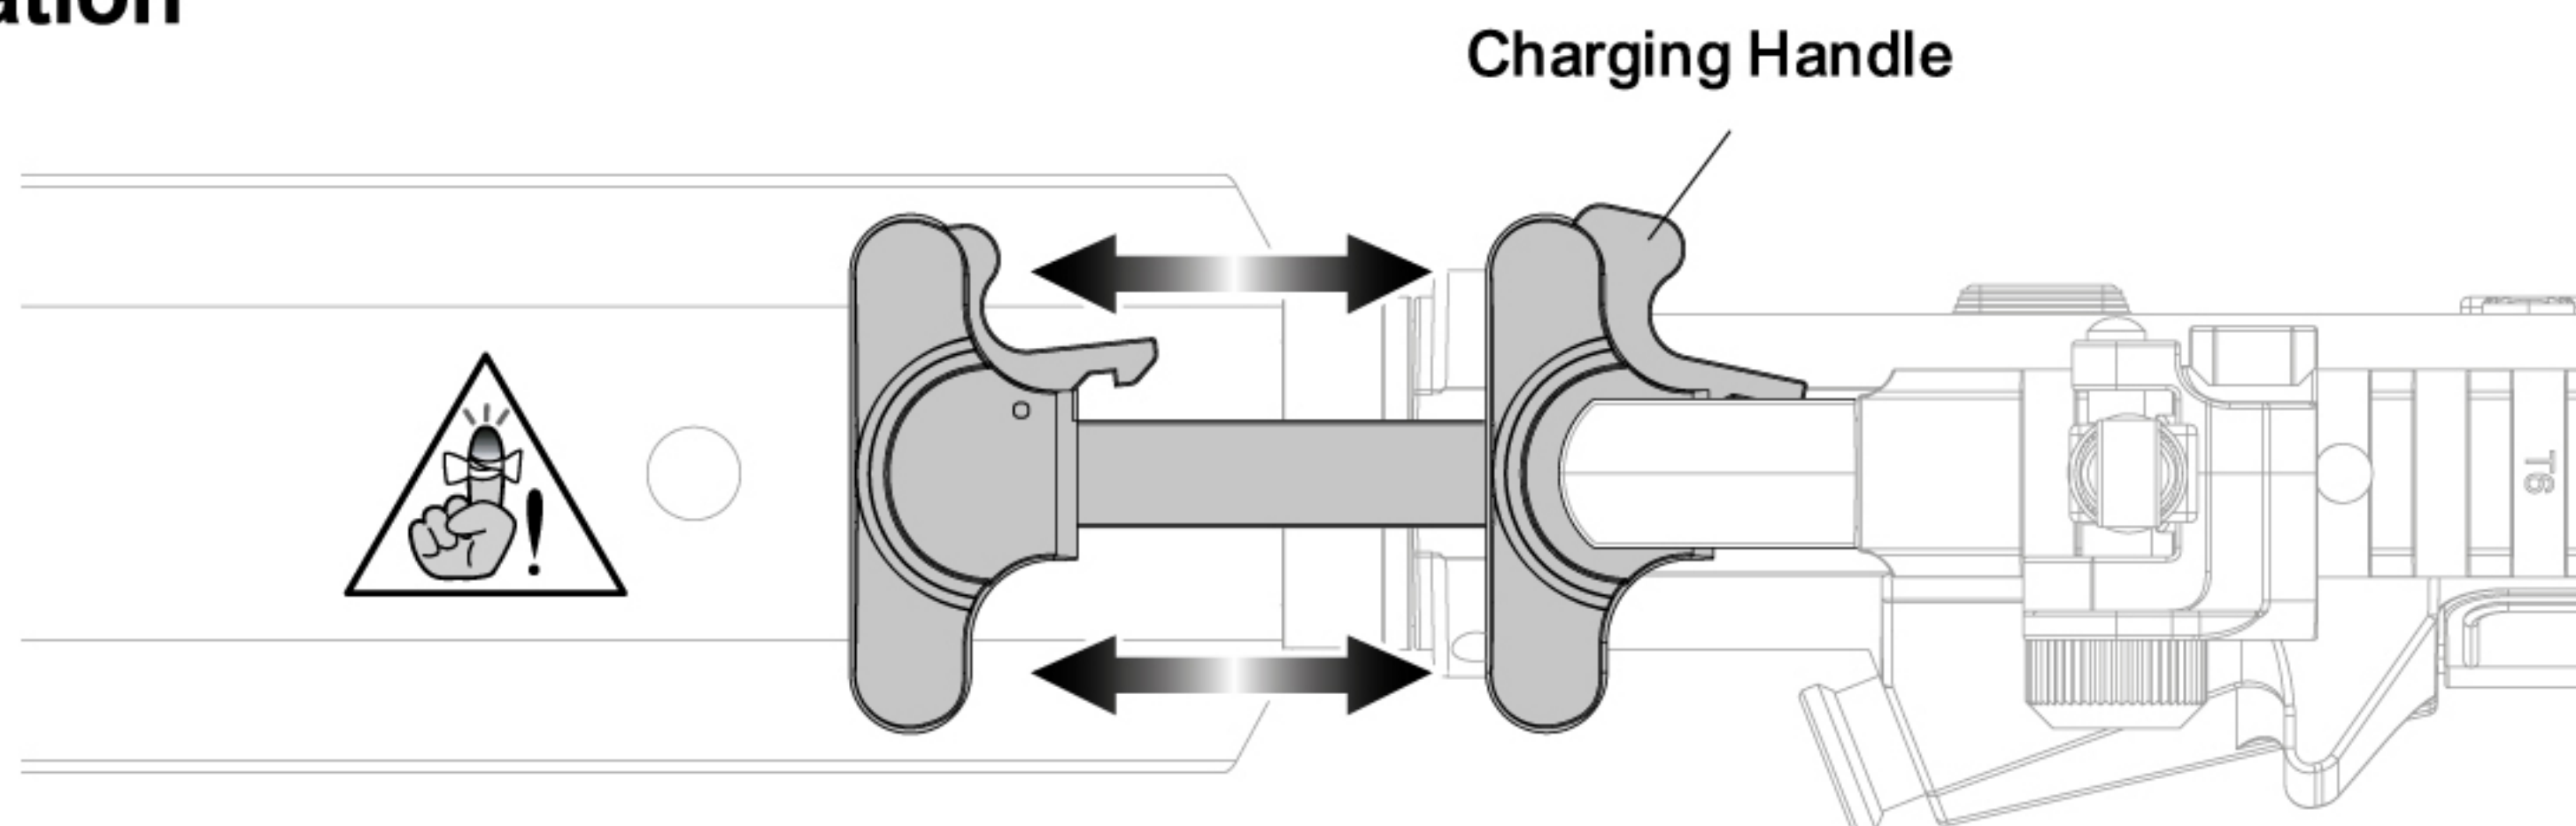

\*Press magazine release and remove magazine

\* BBs may fall out when the magazine is removed. This is normal.

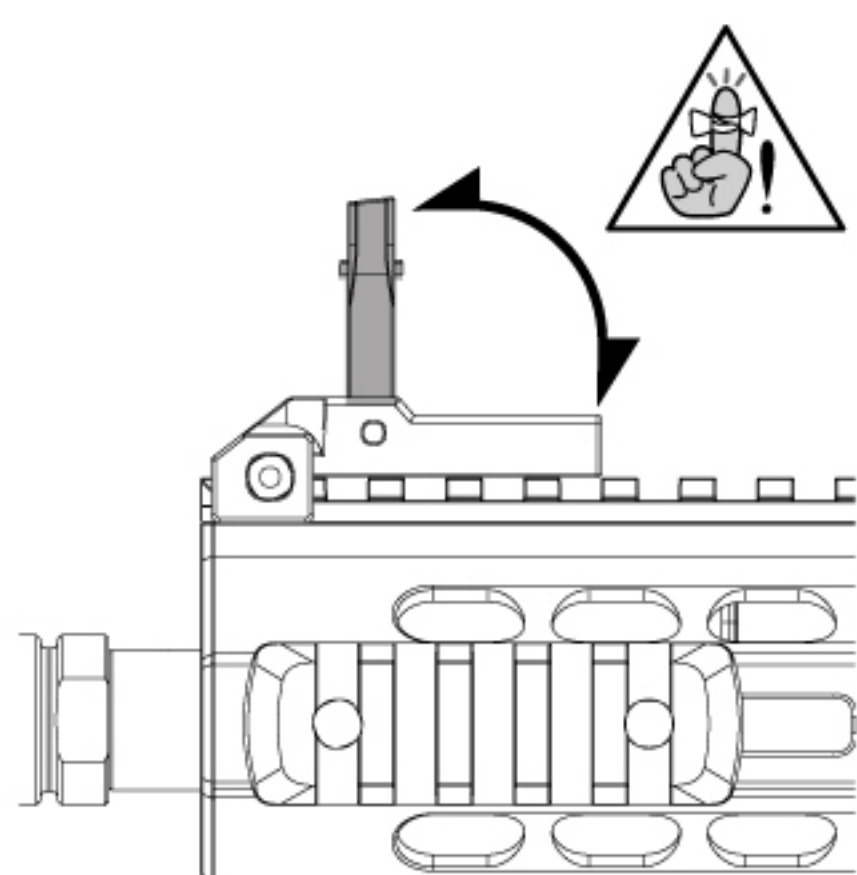

## ● Operation

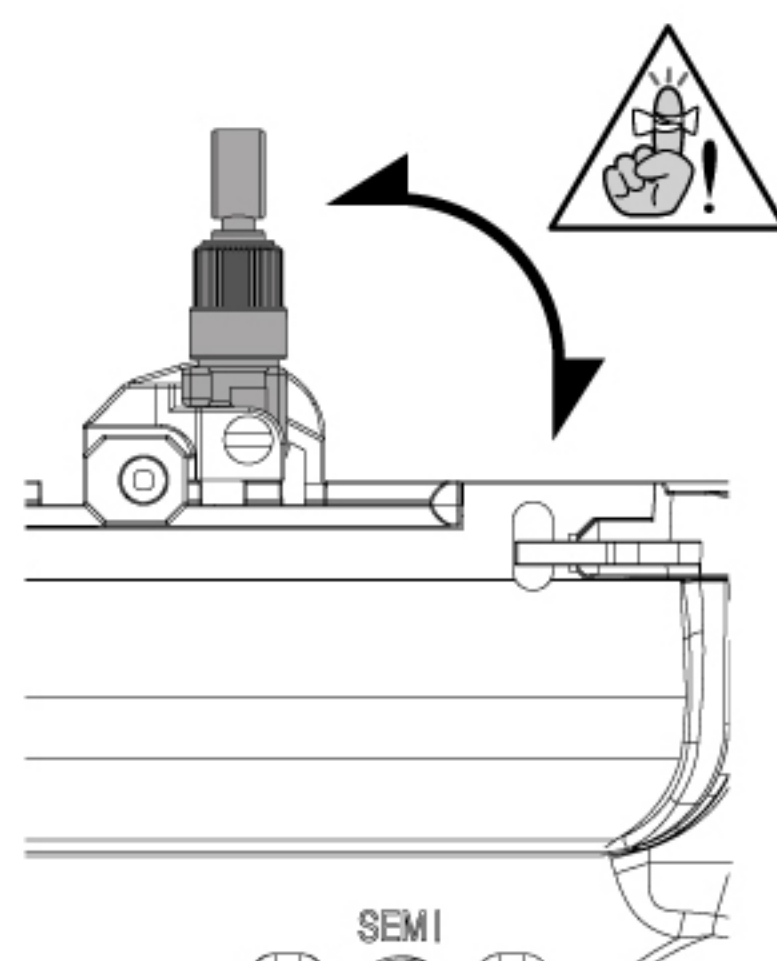

Pull charging handle until you hear a click

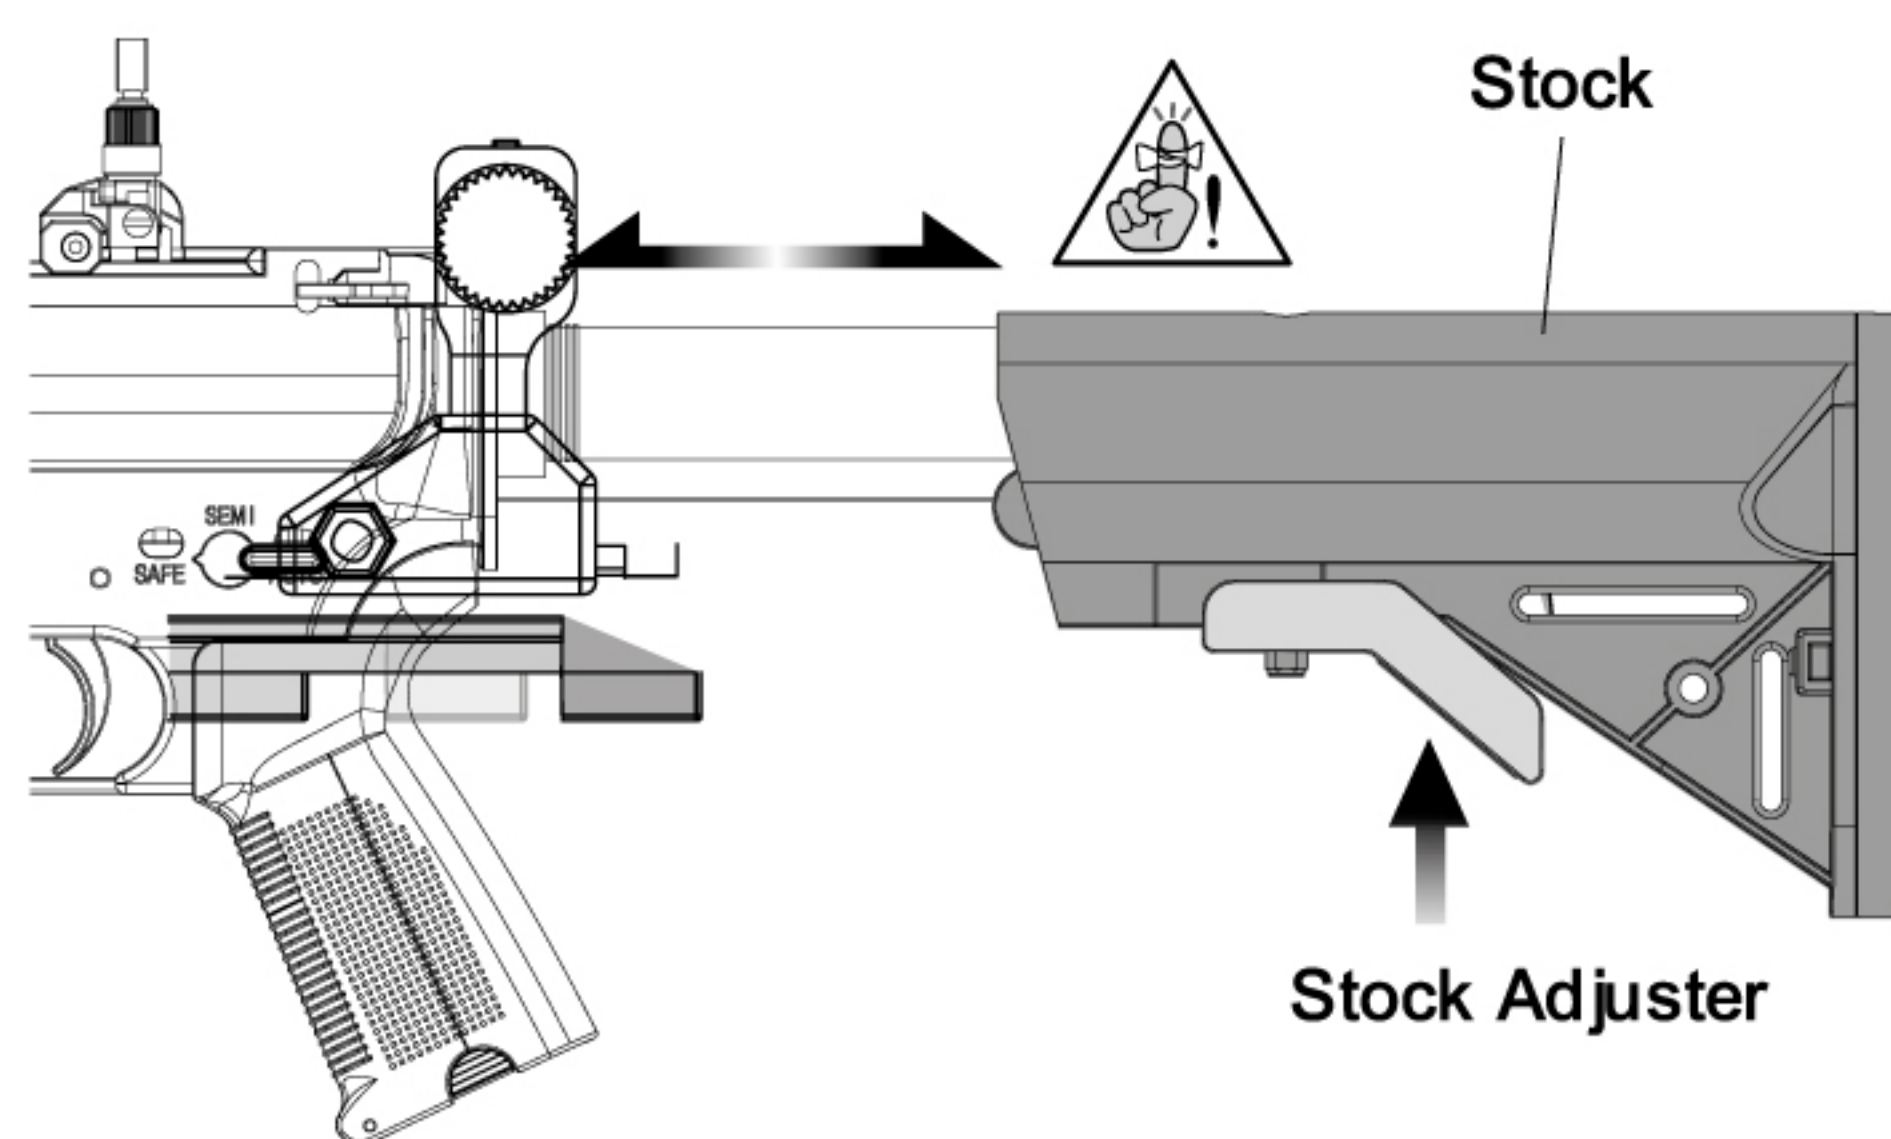

## ● Front Sight

## ● Rear Sight

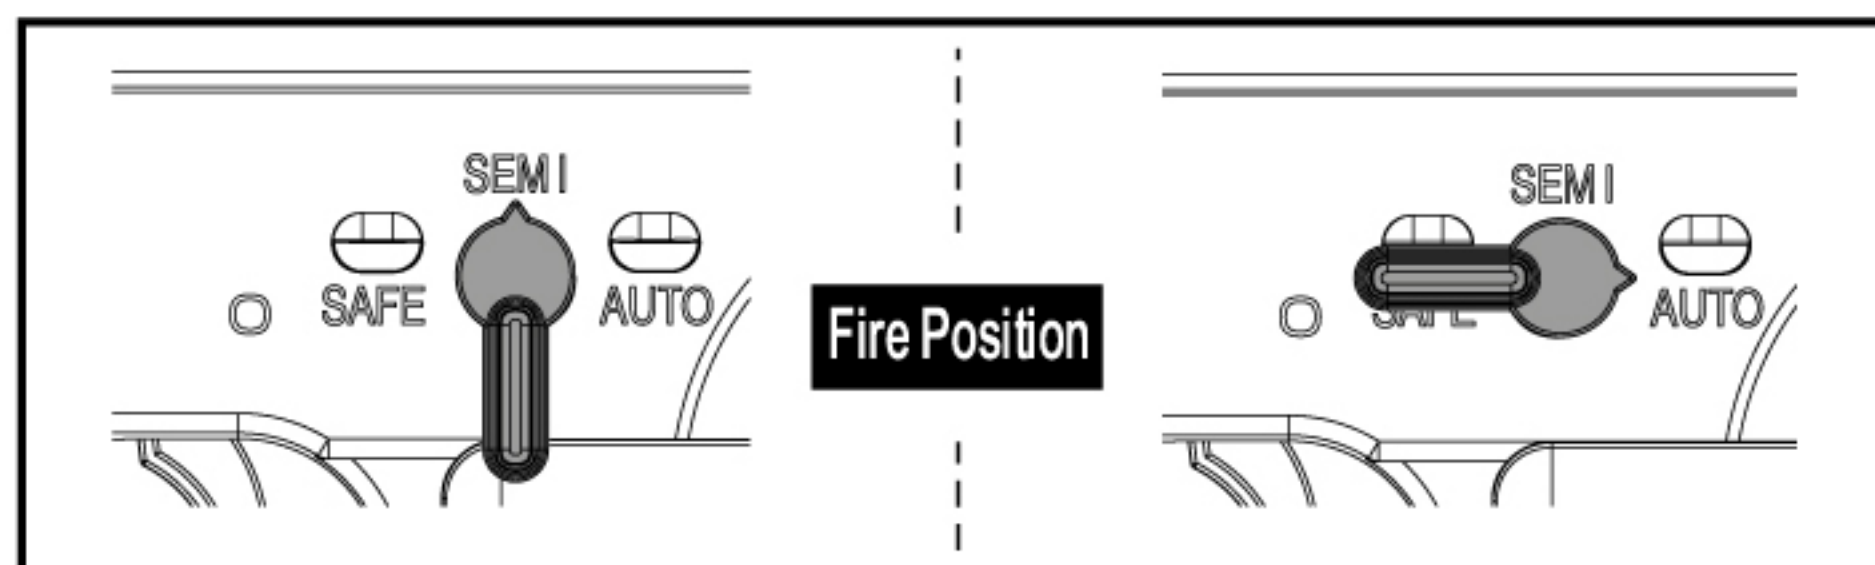

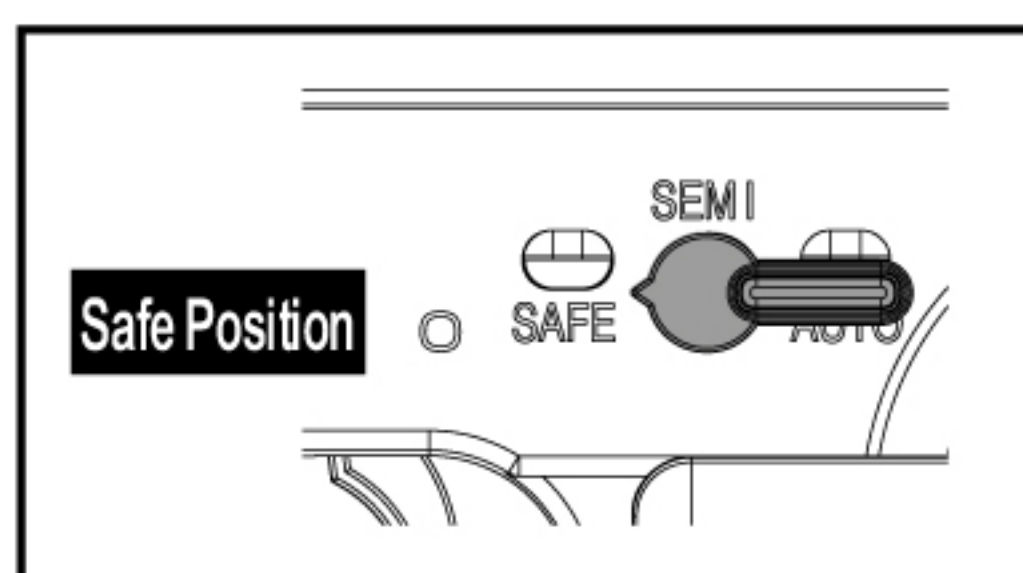

## ● Stock Adjustment

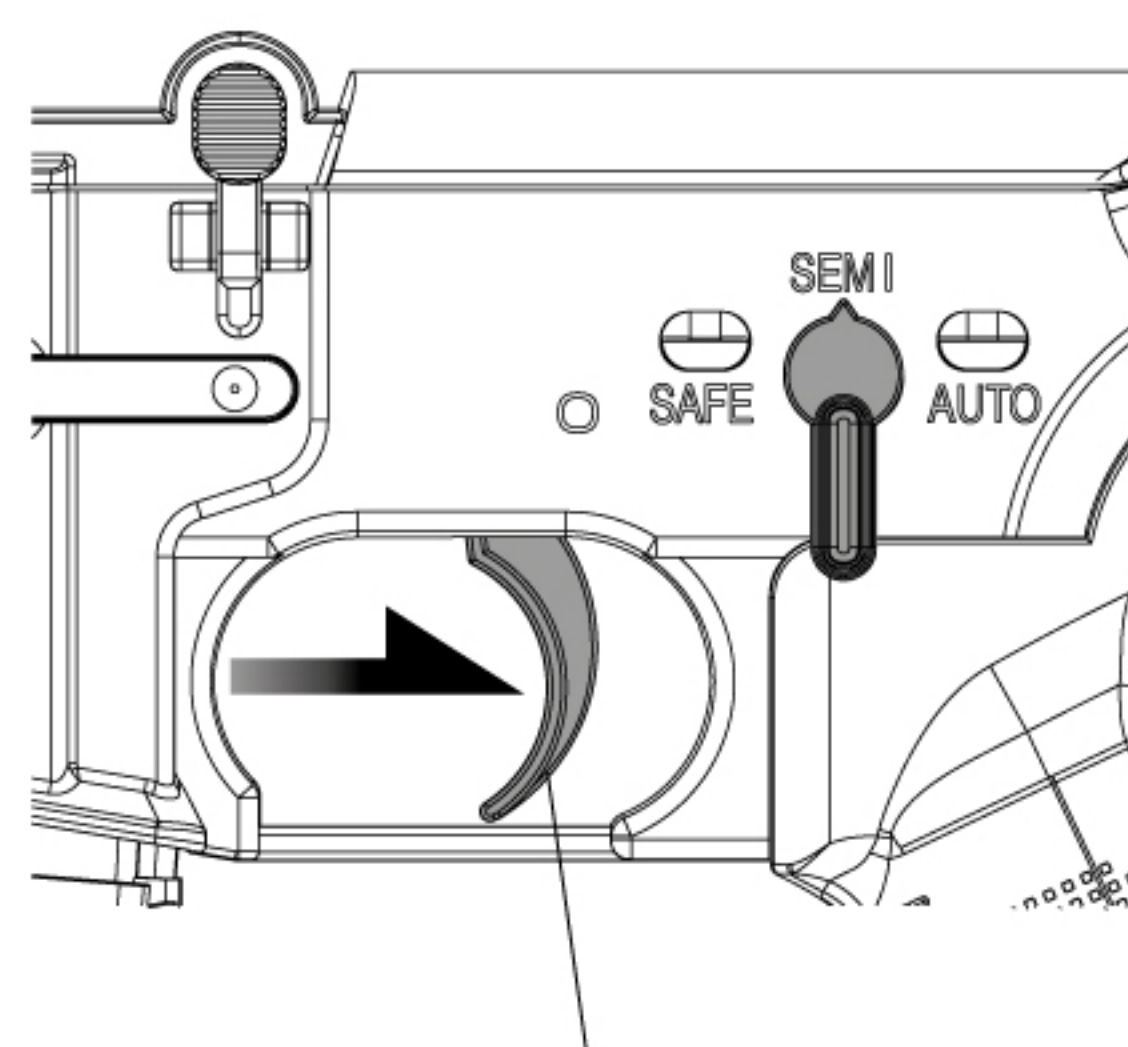

Stock has 5 adjustment options

## ● Safety Operation

\* When the gun is in safe, the trigger cannot be pulled. Do not force the trigger.

## ● Shooting Operation

Pulling the trigger fires one shot

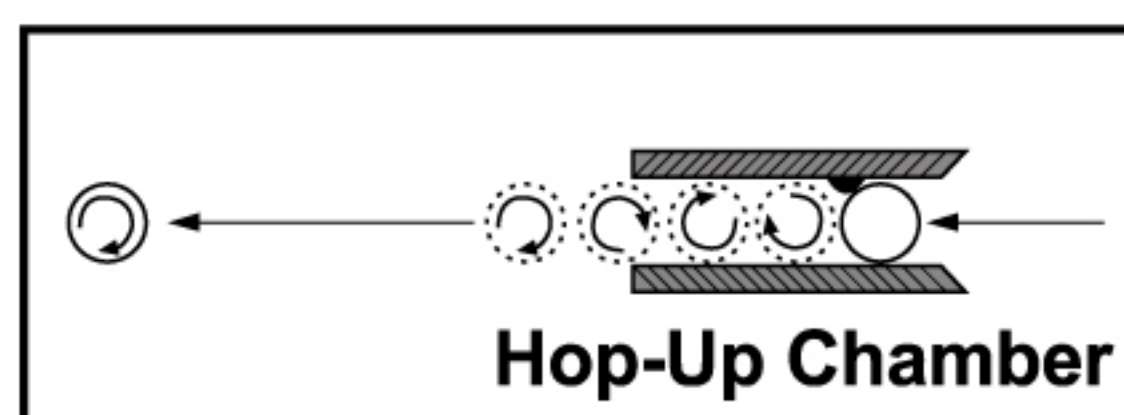

When not firing, ensure that the airsoft gun has its safety mechanism engaged

## Hop-up

A hop-up mechanism extends the range of your airsoft rifle. A rubber patch inside the chamber will impart backspin upon the BB, allowing it to glide through the air by taking advantage of air resistance. This platform uses a soft specialized rubber nub to provide an enhanced hop-up effect.

Hop-up Trajectory

No Hop-Up Trajectory
